

INTERNET OF PEOPLE EVENT

Internet of People Event

November 23, 2018

Studio HvA Amsterdam, The Netherlands

<https://www.iopevent.com/>

The Internet of People Event will take place on November 23, 2018, at Studio HvA, in Amsterdam, The Netherlands.

Scope: Internet of People (IoP) = Internet of Things (IoT) + the 'WOW' factor, The Human. In the following years we will see an entirely new Internet emerging, as the Internet unleashes itself from the creators' intentions and develops in transformative ways. Humans are shaping the future of this new human Internet. When things get smarter, how do humans and things cooperate? The conference will address this social aspect of the internet, the internet of humans.

Focus topics: Interaction between things and humans | The Human Internet vs the Machine Internet | People as peripherals | Big Data; New open standards for personal data | Social impact of connected devices | Internet of Brain | Security and Privacy | Ethical issues | Cloud intelligence | Cognitive computing | Wearable Technology and Application | Technology developments: Human body signal collection/ Biometric Sensors/ Improved human interface

It will be a niche and innovative event, where you will be able to join in the discussions around the main topics. The conference also includes lunch, breaks and drinks & snacks in the evening, a nice opportunity of networking with the other attendees and the speakers (you will also receive the list of participants a couple of days before the conference, so you can plan ahead).
